CARPE DATUM

Fed Data Prospector
VOLUME 1. ISSUE 32.
July 16, 2019

Welcome to Carpe Datum's **Fed Data Prospector** (Vol. 1, Issue #32). From the looks of the overall opportunity flow posted in the last week, the federal data opportunity market appears to be heating up just in time for the FY19/Q4 close-out. Leading the charge, the U.S. Army's Web Based Public Data RFP seems ripe for a number of data company community members to bid:

- *The Army Contracting Command -* New Jersey Information Technology Center, on behalf of the U.S. Army Criminal Investigation Command (USACIDC), has a requirement for nationwide web-based access to reliable public information, document retrieval, and related services required for use in criminal investigations and the other missions.

In this week's news, the question was raised, "Will the IRS Integrated Modernization Business Plan Work?" within the JD Supra's blog:

The IRS plans to deliver improved Taxpayer services and protect Taxpayer data via Four Modernization Pillars...
1. Taxpayer Experience
2. Core Taxpayer Services & Enforcement
3. Modernized IRS Operations
4. Cybersecurity & Data Protection

Happy Fed Data Opportunity Hunting!
